Profile

Full-stack developer skilled in building responsive web apps using React, Node.js, Express, and MongoDB. Experienced in authentication, database integration, and deployment. Passionate about delivering clean, scalable code with intuitive UI/UX

Education

B.E: Computer Science and Technology, L.J. INSTITUTE OF ENGINEERING & TECHNOLOGY 2023 – 2027
Ahmedabad, Gujarat

Skills

Languages

Gujarati English Hindi

Courses

Delta 6.0, Apna College

Full Stack Web Development

Completed an intensive, project-based program covering frontend (HTML, CSS, JavaScript, React, Tailwind, Material UI) and backend (Node.js, Express, MongoDB, SQL). Built real-world projects including Airbnb, LinkedIn, Zoom, and Spotify clones. Gained experience in REST APIs, Redux, authentication, database design, deployment, Git, GitHub, AWS, and WebSocket-based real-time communication.

- Strengthened problem-solving, debugging, and collaboration skills through end-to-end application development.

Projects

Freelance Hub – Freelance Marketplace Platform,

Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, JWT Authentication

- Developed a Fiverr-like platform with job posting, proposals, gig creation, and instant order placement. Built analytics dashboards for clients and freelancers, plus an admin panel for managing users, orders, and gigs.

Skiplly – Smart Queue Booking Web,

Tech Stack: React, TypeScript, Tailwind CSS, ShadCN/UI, Framer Motion, Node.js, MongoDB

- Real-time queue booking system for hospitals, banks, and businesses with role-based access, live status tracking, booking calendar, and business analytics dashboard.

Additional Projects

Desktop Assistant – Speech Recognition Automation Tool,

Tech Stack: Python, SpeechRecognition, PyAudio, Pytsx3, Webbrowser, OS

- Voice-controlled assistant for web searches, opening apps, and automating system tasks with hands-free interaction.

Cricket Champion – Fantasy Cricket Team Generator,

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, Generative AI

- ML model for player performance prediction, fantasy team generation, and player/team comparison with explainable AI insights.
